

Hi Mark,

Thank you for the opportunity to respond to the STIHL SHOP Dealer Website RFP 2026. Ahead of the 18 September deadline for vendor questions, we would appreciate clarification on the following points:

1. Brand standard or optional programme

Will the dealer website framework be a required STIHL SHOP brand standard (as store fit-out is), or an optional programme dealers may adopt?

If required: on what timeline, and does STIHL NZ contract and pay centrally, or does each dealer?

If optional: what adoption does STIHL NZ expect by end of 2027, and how will it be driven?

2. Existing sites

If the whole network of roughly 90 sites is in scope, what happens to the existing dealer websites and their content during migration?

3. Brand assets and STIHL sign-off

Will STIHL supply the official brand asset kit (logos, licensed typography and approved product imagery) so the template can be certified against the brand guidelines during Phase 1?

4. Cybersecurity standards

Can STIHL clarify what specific standards or frameworks are contemplated by 'applicable cybersecurity standards' (for example NZISM, NCSC Minimum Cyber Security Standards, ISO 27001 or equivalent industry best practice)?

We are happy to discuss any of these by phone if that is easier.

Kind regards,
Michael McLarnon
